Cardiovascular Conditioning

recovery. Methods Used: - Low-Intensity Steady State (LISS) cardio, such as brisk walking or cycling, performed 2-3 times weekly. - High-Intensity Interval Training (HIIT), occasionally included for metabolic boost. - Active recovery days involving light activities like swimming or yoga. The focus remains on sustainable, enjoyable activities that complement the strength and mobility work.

Rest and Recovery

Craig Monson emphasizes the importance of rest days, not as a sign of weakness, but as a vital component of progress and injury prevention. Recovery Strategies: - Adequate sleep (7-9 hours nightly) - Proper nutrition rich in protein and micronutrients - Gentle movement or restorative practices on rest days - Listening to the body's signals to avoid overtraining
