What Are the 22 Processes?

The 22 Processes are a series of guided techniques formulated by Abraham to facilitate vibrational shifts. They are designed to be performed sequentially or selectively, depending on individual needs. Each process aims to help practitioners release negative beliefs, improve their mood, and align more closely with their desires.

Understanding the Core Principles Behind the Processes

Vibration and the Law of Attraction

At the heart of the 22 Processes lies the Law of Attraction—the idea that like attracts like. Your predominant vibration determines the experiences you draw into your life. The processes serve as tools to elevate and maintain a high vibrational state, making manifestation more effortless.

Emotional Guidance Scale

Abraham teaches that emotions are indicators of vibrational alignment. Negative emotions signal resistance, while positive feelings indicate alignment. The processes are designed to help you move up the emotional scale, from frustration or doubt toward joy and appreciation.

Deliberate Creation

The ultimate goal of these processes is to foster deliberate creation—intentionally directing your thoughts and feelings to manifest desired outcomes. They emphasize that you are the creator of your reality and that shifting your focus can change your life.

Analysis: This process emphasizes the importance of focused attention and the power of brief, intentional thought. It's a foundational technique for beginners.

Process 2: "Segment Intending"

Purpose: To set clear intentions for each segment of your day.
