What Is a Key Generator, and How Does It Work?

Definition of a Key Generator

A key generator, often abbreviated as "keygen," is a program designed to produce product keys or serial numbers for software applications. These tools claim to generate valid activation codes that can unlock software without purchasing a license.

How Online Key Generators Claim to Work

Online key generator services often advertise as providing free activation keys for popular software, including Adobe Photoshop CS6. They typically operate by:

1. Generating random or algorithm-based serial numbers
2. Attempting to match these keys with the software's validation system
3. Allowing users to input the generated key to activate the software
